OBJECTIVE

Full-stack developer with extensive freelance experience in React, Node, PHP, and Python, delivering tailored web solutions across diverse industries. Skilled in requirement analysis, reverse engineering, and bug-fixing, with a strong background in automotive and banking software enhancements.

EXPERIENCE

Freelance Developer, Self — Oct 2022 – Present

- Developed and delivered websites with a 100% project completion rate, ensuring on-time delivery within budget, while utilizing technologies like PHP, CodeIgniter, JavaScript, React, Node.js, Python, Django, Tailwind CSS, Ajax, MySQL, and REST APIs to meet diverse client needs effectively.
- Maintained and optimized existing websites, enhancing performance and user experience, resulting in a 25% increase in client satisfaction, and managed hosting and deployment processes, reducing deployment issues by 30%.
- Conducted comprehensive testing to identify and resolve bugs, improving site reliability by 40%, while ensuring high-quality and seamless website launches for clients across various industries.

Associate System Analyst, Envestnet Yodlee — Dec 2021 – Oct 2022

- Improved application stability and performance by troubleshooting and resolving complex issues, leading to a 20% reduction in recurring problems and a 30% faster resolution time, enhancing user experience.
- Increased team efficiency by 35% and reduced code conflicts by 40% through effective use of code management and collaboration tools such as Perforce, Jira, and ServiceNow.
- Leveraged monitoring tools like Splunk for performance analysis, enabling faster issue identification and enhancing system reliability across applications.

INTERNSHIPS

Intern, Software Development, Tata Elxsi — Oct 2023 – Jun 2024

- Collaborated in agile sprints, ensuring timely delivery and high-quality code while adapting quickly to new technologies, reducing onboarding time by 40%.
- Developed prototypes to streamline testing cycles, cutting development time by 35% and raising client satisfaction by 45%.
- Spearheaded requirement engineering and functional safety integration, including requirement writing, reverse engineering, and test case development, improving documentation and alignment with project goals.

Intern, IT Department, Abarna Colours — Apr 2023 – Jun 2023

- Enhanced website performance and user experience through regular maintenance and updates, achieving a 25% increase in client satisfaction.
- Conducted thorough testing and debugging, leading to a 40% improvement in site reliability by identifying and resolving critical issues.
- Managed hosting and deployment processes, ensuring smooth launches and reducing deployment-related issues by 30% using technologies such as PHP, CodeIgniter, JavaScript, React, Node.js and MySQL.

PROJECTS

Complete Summarizer (MCA Major Project) github.com/nikhilljpskj/Text

- A web application that summarizes video and text content using TF-IDF and a fine-tuned BART model.
- Tools Used: Python

Hospital Website with CMS github.com/nikhilljpskj/CM

- Developed a hospital website featuring booking management and real-time updates via messaging (Twilio) and email(Nodemailer).
- Tools Used: React.js, Node.js

Online Booking and Membership Registration github.com/nikhilljpskj/KC

- Developed an online booking and membership registration system.
- Tools Used: PHP

ERP + Inventory Management System github.com/nikhilljpskj/erp

- Created ERP + Inventory management system for companies.
- Tools Used: PHP, CodeIgniter

ERP Project github.com/nikhilljpskj/CIT

- Developed an ERP project featuring employee management, stock management, booking and delivery management, and inventory management with real-time updates via email(Nodemailer) and WhatsApp(Twilio).
- Tools Used: React.js, Node.js

Website for a 3D Scanning Company with CMS Booking for Consultation github.com/nikhilljpskj/3D

- Developed a CMS-based booking system for consultations with real-time updates over email (Nodemailer) and WhatsApp (Twilio) for a 3D scanning company
- Tools Used: React.js, Node.js, Tailwind CSS

EDUCATION

College of Engineering Chengannur, Master of Computer Applications Oct 2022 – May 2024

Major: Computer Applications

Naipunnya School Of Management, Bachelor of Computer Applications Jun 2018 – May 2021

Major: Computer Applications

TECHNOLOGIES

Programming Languages: PHP, JavaScript, Java, Python, SQL, HTML, CSS

Web Development: React, Angular, React Native, Node.js, Flask, Django

Frameworks: CodeIgniter, Bootstrap, Tailwind CSS

Databases: MySQL, SQLite, Firebase, Supabase

Version Control: Git, Perforce, GitHub

Tools and Management: Splunk, Jira, ServiceNow, MS Office

CERTIFICATIONS

Network Automation Professional Certificate 06/2024
Arista Networks

Software Testing Professional Certificate 04/2024
LambdaTest

Database Management Systems 05/2023
NPTEL - IIT Kharagpur

Cloud Computing 06/2023
